

# Copperhead® XD 3.0

The CopperHead® XD 3.0 model is the right machine for contractors who want better performance when up against tough applications like; Chaired Rebar, Lower Slump or Poor Subgrades.

The CopperHead® XD 3.0 equipment uses Somero® Patented Laser-Leveling Technology to cut the concrete to a finished grade, screed it flat, and vibrate it smooth in one pass. You will be able to work faster because the CopperHead® XD 3.0 sets grade automatically, allowing the operator to move quickly and efficiently through the work area.

The CopperHead® XD 3.0 machine is compact and lightweight allowing for ease of operation. A 13HP engine provides increased power for the drive train, and a smoother ride.

The CopperHead® XD 3.0 comes with a convenient electric start motor and new features that make operating the machine easier and more accurate. The Hydraulic Drive Motors allows for continuous pulling across low-slump concrete and riding smoothly over chaired rebar and other obstacles.

Copperhead XD3.0 Laser Screed® Model Support Kit

Copperhead XD3.0 Laser Screed® equipment on the job

Model	Copperhead® XD 3.0
Dimension - L x W x H (m)	2.74 x 0.91 x 1.10
