

The MP235 Edger, with its unique rotating guard rings allows you to run along the edges of walls, around columns and pipes—for a close, clean finish every time. This exclusive Allen Rider allows you to edge within 7.93mm of the edge of a wall using Allen's pans and blades, reducing the need to hand finish those areas. This patented trowel features similar specifications as our MP215, along with a stretched frame for improved productivity and operator comfort.

US Patent #6,019,545

FEATURES:

- Four Lights (2 in Front & 2 in Back)
- Independent Manual Pitch Control
