

S-22EZ

Developed with customer feedback, Somero is proud to launch the new S-22EZ. As the most technologically advanced Laser Screed® machine available in the world, the S-22EZ is packed with features that give you the competitive advantage.

Equipped with 360° machine rotation, a 20'6m telescopic boom and your choice of pivoting screedheads, the S-22EZ continues the tradition of delivering the industry's highest quality and production rates with unsurpassed maneuverability. The customized OASIS laser control system is simple to operate and is upgradeable as technology advances. A redesigned, EZ Clean Head reduces clean-up time and improves long term maintenance. New convenience features and redesigned storage compartments improve ergonomics around the machine and operator efficiency.

The S-22EZ options platform allows you to build the machine you need to meet your demands. Options include, but are not limited to: 12' or 14' head width, roller plow, on-board pressure washer with hose reel, operator heat, spray bar and the Somero Floor Levelness System®.
